

SACRED SECRET (THE)

A very famous burglar is temporarily set free from prison so that he can "test" a new kind of safe. The 'burglary' proves a failure and the burglar is taken back to his cell. But during the night he escapes from prison and goes back to the safe that had resisted his attempt during the day; this time he is successful and returns to his cell. The burglary causes a sensation and, by purely accidental circumstances, an unwitting teacher is accused and risks being imprisoned. But, in the meantime, the real burglar is set free and claims the honour of this deed.
